

About Us

GM Hanvy Photography is located in the Houston area and was created in 2007 through the technical and creative collaboration of husband and wife photographers, Gary and Marian Hanvy. Our passion is capturing the world around us in an extraordinary way that evokes emotional and intellectual contemplation by the viewer.

Such themes as Backroad Memories depict subjects found on the side roads and backroads of rural America, most notably in rural Texas while Vanishing Times are photographs taken today of subjects that belong to an earlier time. Whether the image is of a lonely tree on an isolated hill, or the worn exterior of an abandoned gas station from a bygone era, or the simplicity of a single flower, our goal is to capture an image that pulls the viewer into the photograph.

The photographs are as varied as our personalities while still meeting the needs of our clientele. From the boardroom to the bedroom, we have the images that add the finishing touches. Our job is complete only if a photograph brings happiness, warmth and contemplation, to your home or business.
